

A flooring specialist has completed a 6 300 m² car dealership project using tools supplied by Diamond Products - a leading specialist in the manufacture, assembly and sale of diamond tools and equipment for industrial applications. The building consists of a basement, and three floors above ground. Work on the project started in mid-2013, and was recently completed according to specified deadlines and budgets. Diamond Products has played an important role in the continued success of this project, thanks to its high-quality range of machinery that is backed up by dedicated after- sales and technical support.
