

## Leasing contracts on capital intensive machinery

PROFESSIONAL contractors are no longer required to make substantial investments in costly floor grinding and dust collecting equipment, which is now available on a lease basis from Diamond Products - a specialist in the manufacture, assembly and sale of diamond tools and equipment for industrial applications.

Diamond Products has teamed up with Merchant West - an authorised financial services provider specialising in business finance and advisory services that result in flexible, innovative solutions

customised to client needs - by offering leasing contracts on equipment worth R50 000 and above.

This is a major benefit to customers, who are not bound to capital-intensive purchase contracts. Instead, Diamond Products will negotiate the capital amount to be leased as well as the term required with the customer, before Merchant West conducts a thorough credit check application.
