

Entry-level floor saw

Benefits to the industry: The DP 13 HP-400 concrete saw from Diamond Products, can be fitted with blades as large as 400mm, ensuring respectable cutting depths. It is ideally suited for repairing pot holes and cutting neat curbs or trenches across roads for pipe laying.

Maintenance: The simplicity of the machine is another major advantage to smaller contractors, as it has a minimal amount of moving parts, and can be easily loaded onto the back of a bakkie.

Back-up service: The DP 13 HP-400 concrete saw is powered by a 13hp Honda engine, providing customers with further peace of mind with regards to reliability and parts availability. **mmp**
